CITY CLERK
HONOLULU, HAWAII

In testimony of and for positive consideration to, I support the proposed Bill 7 to favorably affect the community, both to the general public and businesses operating in the community.

In collaborative efforts within our community to revitalize a sense of pride and old town marketability to locals and tourists, Wahiawa will stand to greatly benefit. In the past, we have witnessed persons using the sidewalk area along Mango Street to gather, sleep, cook, gamble, urinate and defecate upon. Where our business property is immediately adjacent to the sidewalk, we have had to dispose of rubbish and personal bodily waste as it has been left and disposed of upon our property. We have also heard from our customers who work nearby and walk to our establishment for meals of the unpleasantities encountered while enroute.

I support the spirit and the notions conveyed in bill 7 to provide safe and sanitary sidewalks for our community to travel and use as a public means of transportation space and for the allocated sidewalk spaces to be freely traversed without obstruction or hinder.

Thank you for your favorable consideration and time.
